Queen Elizabeth Drive, Cooloola Cove - Drainage works

Summary
Council has allocated funding in the 2015/16 financial year to improve stormwater drainage along a section of Queen Elizabeth Drive, as shown on the plan attached.

Works proposed
The project will install additional storm water drainage pipes and a controlled discharge to improve drainage in the area.

The work will include:

- improved stormwater drainage capacity under a property access and a pedestrian footpath
- install a concrete lined drain along Queen Elizabeth Drive
- reinstatement of existing property access.

Traffic management
Traffic controls will be in place during construction and property access may be affected for short durations. Council officers will contact adjacent residents to discuss timing for access or parking if works are likely to impact entrances.

Your patience during construction is appreciated. Traffic management measures will be in place to ensure the safety of pedestrians and motorists.

Timing
Construction is currently scheduled to commence mid 2016, subject to weather
