Preschool

Education Program

CLEANAWAY
Making a sustainable future possible together

The modules developed for the **kNOw waste™** Preschool Education Program are designed to improve children's knowledge in relation to waste issues, develop environmental values and encourage positive long-term environmental behaviours.

This program offers...

- Three modules focused on waste and environmental issues.
- Lessons presented at your preschool by Waste Educators.
- Practical and fun activities for children to reinforce learning.
- Lessons suitable for children aged 3-5 years.

Litter, Litter Everywhere

Littering is part of a wider social and environmental problem. Children will learn what littering is and how it can harm our environment. Children will meet *Lewis the Litterbug*, learn about the consequences of littering and ways we can stop littering from occurring.

Binwise

In a fun and interactive lesson, children will learn about Council's waste service and how they themselves are able to contribute to waste reduction.

Nature's Recyclers

Meet the hungry worms and the clever composters who help nature recycle organic material found in our waste stream. Children will investigate what organic waste is and how to make and maintain compost or a worm farm.

All this is **FREE**
to Preschools
in your local council area.
