

# New Streetlight Application

## 2025/2026

### Application for New Streetlight 2025/2026

#### Important Information:

This application form is applicable to any resident or property owner requesting the installation of a new streetlight within the Gympie Regional Council local government area. Streetlight requests are generally limited to infill lighting, meaning new lights are only considered where there are gaps in existing street lighting coverage.

New streetlights are typically installed on existing power poles. Requests for new poles are not generally supported and may only be considered in exceptional circumstances.

All applications are assessed against Council's safety, visibility, and lighting criteria to ensure appropriate lighting levels are provided while maintaining road user and community safety. Approval of applications is subject to assessment outcomes and the availability of funding within Council's street lighting program.

If the requested streetlight is located on a State-controlled road, or the lighting infrastructure is managed by another authority, applications must be lodged with the relevant managing authority (such as the Department of Transport and Main Roads or the electricity distributor). These requests cannot be assessed by Council.

#### Please forward completed application and/or queries to:

**Mail:** Gympie Regional Council  
PO Box 155  
Gympie Qld 4570
